Contents

1 GT Table

This gt table is based upon the National Election Survery data from last class.

<div align="center">

Gender by Year
National Election Survey

Year	Female	Male	Total
1994	627	613	1240
1996	545	498	1043
1998	493	446	939
2000	251	225	476

</div>

2 GT Summary

This gtsummary table shows a regression using female to explain party identification based upon the National Election Survery data from last class.

Characteristic	Beta	95% CI[1]	p-value
female	-0.19	-0.25, -0.12	<0.001

[1]CI = Confidence Interval

My Github repository for this milestone is in the footnote below.[1] I used Xie (2019) and Burzillo (2020) in order to complete this milestone.
